  - Created lesson plans that included interactive, creative thinking, and discussion driven curriculum for a diverse body of geometry students.
  - Constructed lessons that used hands-on lab activities, demonstrations, and interactive computer lessons to instruct high school Juniors and Seniors in algebra-based physics.
  - Used discussion-based problem-solving lessons to help remedial math students to improve their algebra, geometry and trigonometry skills for post-secondary education.
  - Provided an equitable and inclusive atmosphere for diverse students.
  - Guided student athletes through drills that focused on using the proper techniques to keep them safe
  - Tutored students in math focusing on problem solving skills.

Research Experience

- **University of Tennessee, Department of Physics and Astronomy** **Knoxville, TN,**
  Graduate Research Assistant *May 2014 – Present*
  - Extracted complete inclusive cross sections for the MARATHON data set
  - Analyzed a large set of data involving multiple nuclear targets and Monte Carlo simulations using Python, C++ , ROOT, and Fortran.
  - Lead in developing software designed to promote the collaborative use of a SQL database.
  - Lead an effort to investigate and repair faulty beam line detectors.
  - Coordinated the productive and efficient use of beam time through planning and communication between experimentalists, staff, and technicians.
  - Maintained and refurbished detector components (PMTs, scintillators...)
  - Calibrated detectors to control data quality and assessed the detectors' performance.
  - Created module layouts and cable maps for efficient reuse of signal components.
  - Collaborated with a diverse group of scientists, leading projects, working as a team member, and mentoring other students in analysis software and techniques.
